NEW YORK, N. Y.

The Welding Journal

Index to Volume 21—1942

Published by the American Welding Society, 33 West 39th Street, New York, N. Y.

Part I—The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, news, biographical items, current welding literature and advertising.

Page Allocation by Issues

January.....	1– 78	July.....	433–502
February....	79–148	August.....	503–586
March.....	149–218	September....	587–656
April.....	219–302	October.....	657–742
May.....	303–362	November....	743–816
June.....	363–432	December....	817–886

Part II—Welding Research Supplement

This section includes the reports of the Welding Research Committee, critical digests of the literature, reports of the Fundamental Research Division and of the Industrial Research Division.

Page Allocation by Issues

January....	1-s– 64-s	July.....	297-s–352-s
February...	65-s–112-s	August.....	353-s–388-s
March.....	113-s–160-s	September..	389-s–440-s
April.....	161-s–208-s	October....	441-s–524-s
May.....	209-s–256-s	November..	525-s–572-s
June.....	257-s–296-s	December..	573-s–620-s

PART I—THE WELDING JOURNAL

SUBJECT INDEX

Aircraft Construction and Maintenance, Welding in—A. K. Seemann, 437–442.
Aircraft Industry, Welding in—F. M. Smith, 23–32.
Aircraft Structures, Spot Welding in—E. S. Jenkins, 839–843.
Aircraft Welding Applications—F. H. Stevenson, 676–682.
Aircraft Welding of Light Gage Tubing—J. E. Weed, 379–383.
Alternating Current Welding in Vertical and Overhead Position—H. O. Westendarp, 695–697; discussion by C. J. Holslag, 833.
Aluminum Alloys for Spot Welding, Preparation of —T. E. Piper, 661–664.
Aluminum Alloys, Spot Welding, Tentative Standards, 515–555.
Aluminum Bronze, Welding with—C. E. Swift, 843–845.
Aluminum Spot Welds, Radiographic Aspects of—R. C. Woods and S. L. Rich, 101–104.

Bridge, Welded Design, Discussion of—L. S. Moisseiff, F. L. Plummer, C. E. Webb, 185–186.
Bridge, Welded in Tasmania—D. V. Isaacs, 601–608.
Bridge Welding—T. H. Gardner, 43–46.
Bronze, Aluminum, Welding with—C. E. Swift, 843–845.

Cast Iron Repair—R. E. Baker, 272.
Cast Iron Welding Rods and Electrodes—R. J. Franklin, 698–699.
Conservation and Effective Use of Equipment and Supplies for Welding and Cutting—H. Ullmer, 823–826.
Conservation—Keep Your Arc Welders Welding—R. F. Wyer, 449–453.
Conservation of Steelmaking Raw Materials—C. M. Parker, 747–755.
Conservation of Welding Electrodes—C. B. Herrick, 256–260.
Conserving Oxygen—G. V. Slottman, 371–372.
Copper Pressure Vessels, Arc Welding of—G. H. Sandberg, 507–509.
Cutting Billets for Steel Forging—H. E. Rockefeller, 83–89.
Cutting—Correct Procedures and Common Faults—H. H. Moss, 119.
Cutting—Factors Affecting the Accuracy of Ordnance Machine—H. G. Hughey and A. H. Yoch, 684–690.
Cutting, Flame, in Shipbuilding—E. R. McClung and H. L. Wagener, 105–111.
Cutting, Hand, Improving Accuracy of—H. H. Moss, 261–265.
Cutting Heavy Steel Sections—R. B. Aitchison, 395–398.
Cutting in Shipbuilding—R. F. Helmkamp, 827–833.
Cutting in Ship Construction—F. G. Outcalt and J. M. Keir, 5–15.
Cutting in Steel Mills—C. D. Baumer, 836–838.
Cutting, Oxyacetylene Speeds War Production—R. F. Helmkamp and A. H. Yoch, 252–255.

Design of Joints for Arc and Gas Welding Processes—Committee Report, 758–766.
Design, Welding, Saves Steel—A. F. Davis, 266–270.
Distortion and Shrinkage Problems in Ships and Other Large Structures—LaMotte Grover, Part I—Prevention of Distortion, 665–675; Part II—Methods of Correcting Distortion, 776–781.
Distortion, Controlling Effect of, in Welded Structures—A. E. Berriman, 373–378.

Electrode Conservation—C. B. Herrick, 256–260.
Electrodes and Welding Rods for Cast Iron Welding—R. J. Franklin, 698–699.
Electrodes for Welding Steels of High Hardenability—Proposed A.W.S. Specification, 513–514.
Electrode Specifications, A.W.S.-A.S.T.M., 594–597.
Electrodes, Use of Larger—H. O. Westendarp, 386–387.
Engineering Essentials for Welders—H. M. Priest, 230–251.
Expansion and Contraction—H. H. Griffith, 591–593.
Eye Protection in Welding and Cutting—H. F. Ingersoll, 320–321.

Filler Metal, Arc Welding—O. T. Barnett, 170–173.
Filler Metal for Welding Cast Iron—R. J. Franklin, 698–699.
Filler Metal Specifications, A.W.S.-A.S.T.M., 594–600.
Flame Cutting in Shipbuilding—E. R. McClung and H. L. Wagener, 105–111.
Flame Hardening of Round Surfaces–Stephen Smith, 443–448.
Flame Preheating and Stress Relieving High-Pressure Pipe Lines—P. T. Onderdonk and W. Peterson, 96–101.
Fumes from Arc Welding—G. C. Harrold, 367–370.

Gas Cutting Curved Surfaces—C. N. Holwill and A. N. Kugler 609–610.
Gas Welding Rods, Specifications, A.W.S.-A.S.T.M., 598–600.
Grinders, Special Swing Frame—J. S. Green, 42.

Heliarc Welding, Magnesium—T. E. Piper, 770–772.
High-Speed Steel-Tipped Tools—C. B. Ericson, 834–835.
Hoist, Welded, 325.

Inspection of Arc Welds, Visual—W. L. Warner, 682–683.
Inspection of Fusion Welds—A.W.S. Recommended Practices for, 613–624.

Jig for Complicated Work—H. J. Hibbett, 16.
Jigs for Flame Cutting Curved Surfaces—C. N. Holwill and A. N. Kugler, 609–610.
Joints for Arc and Gas Welding Processes—Committee Report, 758–766.

Locomotives, Welding Applied to—James Partington, 90–93.
Low Alloy N-A-X High-Tensile Steel, Spot Welding of—C. R. Schroder, 690–694.

Machinery and Equipment, Oil—A. F. Davis, 392–394.
Machinery Bracket, Arc-Welded—A. F. Davis, 176.
Machinery, Naval—H. W. Hiemke and J. D. Bert, 157–164.

Machinery, Reducing Cost—R. Wagner, 93.
Magnesium Welding, Heliarc—T. E. Piper, 770–772.
Maintenance Welding—Conservation of Material, A. O. Andersen and W. L. Mitzenius, 821–823.
Mobile Lubricating Equipment, Manufacture of —A. F. Davis, 331.

Ordnance Machine Cutting, Factors Affecting the Accuracy of—H. G. Hughey and A. H. Yoch, 684–690.
Oxyacetylene Applications in Industrial Program—W. S. Walker, 179–183.
Oxygen Conservation—G. V. Slottman, 371–372.

Pipe Lines, Flame Preheating and Stress Relieving—P. T. Onderdonk and W. Peterson, 96–101.
Piping, High Pressure—H. J. Irrgang, Jr., 610–612.
Piping Installations—New Techniques—G. G. Landis, 329–330.
Piping Valves, Arc Welded—H. C. Elliott, 755–756.
Porcelain Enamel Hot Water Tanks, 21–22.
Preheat Temperature Chart, 781–782.
Preparation for Welding—H. R. Morrison, 767–769.
Pressure Vessels, Copper, Arc Welding of—G. H. Sandberg, 507–509.
Pressure Vessels, Design of—H. F. Lassner, 383–385.
Procedure Control in Metal Arc Welding—O. T. Barnett, 170–173.
Production Welding Speeded Up by Larger Electrodes—H. O. Westendarp, 386–387.
Propeller Repair—Robert Wagner, 20–21.
Pulsation Welding Process in the Welding of Large Structures—O. C. Frederick and R. P. McCants, 321–325.

Radiographic Aspects of Aluminum Spot Welds—R. C. Woods and S. L. Rich, 101–104.
Reclaiming Twist Drills—G. E. Greaser, 556–557.
Removing Broken Stud Bolts—A. F. Davis, 177.
Repair Cast Iron Cylinder Heads, 183.
Repairing Cracked Drop Hammer Frame—A. P. Demmer, 558.
Repair of Cast Iron—R. E. Baker, 272.
Repair of Propeller—Robert Wagner, 20–21.
Repair Welding in Alaska—B. L. Crosby, 326–328.
Repair Welding with Aluminum Bronze—C. E. Swift, 843–845.
Residual Stress in Welded Ships—H. W. Pierce, 307–314.
Resistance Welders, Electrical Characteristics and Proximity Effect of Work Materials—J. H. Cooper, 112–117.
Resistance Welding, Pulsation Process, Large Structures—O. C. Frederick and R. P. McCants, 321–325.
Resistance Welding Sequence Timers, NEMA Standardization of—F. H. Roby, 317–319.
Resistance Welding Stainless Steel 18–8—Joseph Winlock and J. J. MacKinney, 153–157.
Resistance Welding, Voltage Variation Tolerance for—L. G. Levoy, 454–460.

Safeguards for Arc-Welding Operators in War Production—W. E. Wilson, 772–775.
Safety, Effect of Welding Arc and Cutting Flame on Eyes—H. F. Ingersoll, 320–321.
Safety, Welding Fumes from Arc Welding—G. C. Harrold, 367–370.
Sewage Treatment Plant at Gary, Ind.—A. F. Davis, 460–461.
Sheet Metal Welding—R. A. Gast, 389.
Ship, Blockade-Breaking Cargo—A. F. Davis, 175.
Shipbuilding, Arc-Welding Equipment in—G. W. Curry, 851–852.
Shipbuilding, Flame Cutting in—E. R. McClung and H. L. Wagener, 105–111.
Ship Construction, Welding and Cutting in—F. G. Outcalt and J. M. Keir, 5–15.
Shipbuilding, Gas Cutting in—R. F. Helmkamp, 827–833.
Ship Repair—Sabotaged Italian—A. F. Davis, 184.
Ships and Other Large Structures, Distortion and Shrinkage Problems in—Part I—Prevention of Distortion, LaMotte Grover, 665–675; Part II—Methods of Correcting Distortion, 776–781.
Ships, Converting Ore Boats—Robert Wagner, 400.
Ships, Residual Stresses in—H. W. Pierce, 307–314.
Ships, Straight-Line Production of Liberty Cargo—J. A. Corlett, 271–272.
Shotweld Process of Welding Stainless Steel 18–8—Joseph Winlock and J. J. MacKinney, 153–157.
Shrinkage and Distortion Problems in Ships—Part I—Prevention of Distortion, LaMotte Grover, 665–675; Part II—Methods of Correcting Distortion, 776–781.
Socket Welding—Robert Wagner, 185.
Spot Welding Aluminum Alloys, Preparation of—T. E. Piper, 661–664.
Spot Welding in Aircraft Structures—E. S. Jenkins, 839–843.
Spot Welding of Aluminum Alloys—Tentative Standards and Recommended Practices and Procedures, 515–555.
Spot Welding of N-A-X High-Tensile Steel—C. R. Schroder, 690–694.
Spot Welds, Aluminum, Radiographic Aspects of—R. C. Woods and S. L. Rich, 101–104.
Spot Welds, Structural and Metallurgical Properties of Condenser Discharge—G. S. Mikhalapov and T. S. Falls, 223–229.
Stack, World's Tallest—A. F. Davis, 118.
Stainless Steel Arc-Welding Electrodes for Welding Steels of High Hardenability—Proposed A.W.S. Specifications, 513–514.
Stainless Steel 18–8 Shotweld Process—J. L. Winlock and J. J. MacKinney, 153–157.
Stainless Steel Tubing Fabricated—H. S. Card, 625.
Steelmaking Conservation of Raw Materials—C. M. Parker, 747–755.
Steel, What Happens in Welding of—P. E. Timmerman, 315–316.
Stress Relieving High-Pressure Pipe Lines—P. T. Onderdonk and W. Peterson, 96–101.
Stresses in Welded Structures—A. E. Berriman, 373–378.
Stretchers, All-Steel Emergency—Francis W. Klay, 757–758.
Structural, Arc-Welded Cyclotron—A. F. Davis, 15.
Structural, Design of Welded Steel Work in Bridgewater Bridge, Tasmania—D. V. Isaacs, 601–608.
Structural, Design of Lap-Welded Continuous Beams—A. Barjansky, 388–391.
Structural, Fire Towers Welded, 270.
Structural, Subway Construction—G. S. Salter, 165–169.
Structural Welding in Continuity—M. P. Korn, 17–20.
Stud Welding System—A. M. Candy, 509–512.
Subway Construction—G. S. Salter, 165–169.

Tank Accident Repair—H. P. Rigsby, 41.
Tanks, Hot Water, Porcelain Enamel, 21–22.
Tanks, Storage, Repairing—R. E. Wagner, 173–174.
Tanks, Welding—W. A. Shelton, 853.
Temperature Data—George Sykes, 178.
Temperature for Preheating, Chart—781–782.
Timers, Resistance Welding, Standardization of—F. H. Roby, 317–319.
Tools, High-Speed Steel-Tipped—C. B. Ericson, 834–835.
Training Welding Operators for National Defense—J. A. Waln, 32–40.
Tubing, Stainless Steel, Fabricated—H. S. Card, 625.
Tubing, Welded Steel and Its Application in War Production—H. S. Card, 846–851.
Twist Drills—G. E. Greaser, 556–557.

Unionmelt Welding in Ship Construction—F. G. Outcalt and J. M. Keir, 5–15.

Welders, Engineering Essentials for—H. M. Priest, 230–251.

X-Rays in General Industrial Application—R. T. Foreman, 94–95.

Welding Research Committee

PART II—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

A.C. *vs.* D.C. Arc-Welded Joints—Leo Albert Moore, 352.
Aircraft Arc-Welding Electrodes, Utility Characteristics of—C. B. Voldrich and R. D. Williams, 540–553.
Joints, Fatigue Strength of—T. V. Buckwalter and O. J. Horger, 525–539.
Spot Welding Research—W. F. Hess, R. A. Wyant and B. L. Averbach, 257–265.
Steels, Cr-Mo—Part II—A Review of the Literature from July 1, 1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 389–403.
Structural Parts, X-4130 Flash Welded—R. P. Della-Vedowa, 421–426.
Tubing—Effect of Residual Stress and External Restraint on Some Welding Characteristics of SAE X-4130 Steel Tubing—G. Sachs and W. E. Davis, 427–433.
Aluminum Alloys, Cleaning for Production, Spot Welding—Fred Morris, 197.
Correlation of Metallographic and Radiographic Examinations of Spot Welds in—D. W. Smith and F. Keller, 573–583.
Spot Welds in Alclad 24S-T—W. F. Hess, R. A. Wyant and B. L. Averbach, 348–352.
Spot Weld Test Specimens—W. F. Hess, R. A. Wyant and B. L. Averbach, 113–122.
Arc, Cathode Drop—G. H. Fett, 27–29.
Metal Transfer in—L. J. Larson 107–112; discussion—G. E. Doan, 112.

Bending Tests on Welded Thin Plates of High Tensile Steel—R. Mailänder, W. Szubinski and H. J. Wiester, 30–33.

Carbon-Manganese Steels, Jominy End-Quench Hardenability Tests—George A. Timmons, 467–477.
Tee-Bend Tests on—L. C. Bibber and J. Heuschkel, 485–490.
Weldability of—C. H. Jennings, 448–450; Weld-Bead Hardness and Weld-Bead Bend Tests—O. E. Harder and C. B. Voldrich, 450–466.
Weldability Tests—C. E. Jackson, M. A. Pugacz and G. G. Luther, 477–484.
Carbon-Moly 0.50 Plate, Effect of Cooling Rates on —W. F. Hess, 608–619.
Carbon-Molybdenum Welds, Tensile-Impact Tests of, at Elevated Temperatures—O. H. Henry and M. A. Cordovi, 416–420.
Chromium Steels—Part I—Low-Alloy High-Strength Chromium Steels (Cr ≦ 1%)—A Review of the Literature from July 1, 1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 353–384; Part II—Welding Aircraft Cr-Mo Steels; Part III—Welding Heat, Wear and Corrosion-Resistant Chromium Steels—A Review of the Literature from July 1,1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 389–415.
Cleaning for Production, Spot Welding, Aluminum Alloys—Fred Morris, 197.
Cooling Rates, Effect on the Properties of Arc-Welded Joints in Carbon-Moly 0.50 Plate—W. F. Hess, 608–619.
Corrosion Resistance of Welded Joints—W. Spraragen and H. H. Chiswik, 209–237.
Welding of Light Gage Stabilized Stainless Steel—S. L. Rich, 265–268.
Resistant Chromium Steels—Part III—A Review of the Literature from July 1, 1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 404–415.

Electrodes for Aircraft Welding—C. B. Voldrich and R. D. Williams, 540–553.
Elevated Temperature Tensile-Impact Tests of Carbon-Molybdenum Welds—O. H. Henry and M. A. Cordovi, 416–420.

Fatigue—Notch Sensitivity of Welds—Harry L. Daasch, 60–64.
Report No. 2. Committee F on Calculation and Graphical Representation of the Fatigue Strength of Structural Joints, 87–93.
Strength of Commercial Butt Welds in Carbon Steel Plates—W. M. Wilson, 491–496.
Strength of Metals Subjected to Combined Stresses, Interpretation of Experiments on—Joseph Marin, 245–248.
Strength of Welded Aircraft Joints—T. V. Buckwalter and O. J. Horger, 525–539.
Strength of Welded Joints—A Review of the Literature from October 1936 to September 1941—W. Spraragen and D. Rosenthal, 297–348.
Tests of Full Thickness Plates with and Without Butt Welds—E. C. Huge, 507–514.
Tests of Stainless Steels at Low Temperatures—O. H. Henry and S. Cannizzaro, 387–388.
Tests of Structural Steel Welds—M. Roš, 254–256.
Tests on Welded Thin Plates of High Tensile Steel—R. Mailänder, W. Szubinski and H. J. Wiester, 30–33.
Welded Specimens at Low Temperatures—O. H. Henry and T. D. Coyne, 249–254; O. H. Henry and P. L. Calamari, 291–292.
Fillet and Plug Welds, Static Tests—A Review of the Literature—W. Spraragen and G. E. Claussen, 161–197.
Flash Welding as a Means of Fabricating Aircraft Structural Parts from X-4130 Steel—R. P. Della-Vedowa, 421–426.
Flux for Sulphur Contaminated Steels—Isaac Bencowitz, 237–241.

Girders, Investigation of Welded and Riveted Load-Bearing Stiffeners for—F. J. Evans and Harry Brenman, 280–285.

Hardenability Tests of Carbon-Manganese Steels—Jominy End-Quench—George A. Timmons, 467–477.
Hardness Tests—Weld-Bead Hardness—O. E. Harder and C. B. Voldrich, 450–466.
Heat Flow in Arc Welding, Discussion of—by W. A. Bruce, 33; E. M. Mahla, M. C. Rowland, C. A. Shook and G. E. Doan, 52–53.
Heat-Resistant Chromium Steels—Part III—A Review of the Literature from July 1, 1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 404–415.
Heliarc Welding of Stainless Steel—T. E. Piper,490.
High Tensile Steel, Investigations of—R. Mailänder, W. Szubinski and H. J. Wiester, 30–33.
Plates, Effect of Preheating Temperature Upon Shrinkage Stresses in—Richard W. Leutwiler, Jr., 198–203.
Spot Welding of N-A-X—W. F. Hess and C. R. Schroder, 203–208; Second Report, 241–244.

Impact, Behavior of Spot Welds Under—A. M. Unger, H. A. Matis and E. P. Gruca, 94–98.
Impact Tensile Tests of Carbon-Molybdenum Welds at Elevated Temperatures—O. H. Henry and M. A. Cordovi, 416–420.
Inconel, Nickel and Monel, A Study of the Effect of Core Wire Temper on the Quality of Welds in—F. G. Flocke and K. M. Spicer, 129–132.
Infra-Red Photography Fusion Welds—Wm. T. Tiffin, 1–4.
Instrument for Measuring Tip Force and Current in Spot Welding—Halley Wolfe and R. W. Powell, 293–296.

Jominy End-Quench Hardenability Tests of Carbon-Manganese Steels—George A. Timmons, 467–477.

Low-Alloy High-Strength Chromium Steels (Cr ≦ 1%)—Part I—A Review of the Literature from July 1, 1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 353–384.

Low Temperature Fatigue Tests of Welded Specimens—O. H. Henry and T. D. Coyne, 249–254; O. H. Henry and P. L. Calamari, 291–292.
Low Temperature Tensile Tests of Stainless Steel Welds—O. H. Henry, C. K. Wicks and B. Hirshkowitz 384–387; Fatigue Tests—O. H. Henry and S. Cannizzaro, 387–388.

Magnesium Alloys, Arc Welding of—W. S. Loose and A. R. Orban, 598–607.
Metallographic Investigations of Thin Plates of High Tensile Steels—R. Mailänder, W. Szubinski and H. J. Wiester, 30–33.
Metal Transfer in the Metallic Arc—Louis J. Larson, 107–112; Discussion—G. E. Doan, 112.
Monel, Nickel and Inconel, A Study of the Effect of Core Wire Temper on the Quality of Welds in—F. G. Flocke and K. M. Spicer, 129–132.

Nickel, Monel and Inconel, A Study of the Effect of Core Wire Temper on the Quality of Welds in—F. G. Flocke and K. M. Spicer, 129–132.
Notch Sensitivity of Welds Under Repeated Loading—Harry L. Daasch, 60–64.

Oxygen Cutting, Divergent Nozzle Tips for—J. J. Crowe, G. M. Deming and J. K. Hamilton, 34–43.

Paint, Effect of Zinc Chromate on Welding—C. T. Gayley, 434–439.
Plug and Fillet Welds, Static Tests—Review of the Literature—W. Spraragen and G. E. Claussen, 161–197.
Plug Weld Test—W. E. Riley, 53–55.
Preheating Temperature, Effect of, Shrinkage Stresses in the Welding of High-Tensile Steel Plates—Richard W. Leutwiler, Jr., 198–203.

Radiographic Examinations of Spot Welds in Aluminum Alloys—D. W. Smith and F. Keller, 573–583.
Refrigerant—Cooled Spot Welding Electrodes—F. R. Hensel, E. I. Larsen and E. F. Holt, 583–597.
Residual Stress in Butt-Welded S.A.E. X4130 Tubing—Part I—G. Sachs and T. Graham, 122–125.
Residual Stress and External Restraint on Some Welding Characteristics of S.A.E. X4130 Steel Tubing—G. Sachs and W. E. Davis, 427–443.
Residual Stresses in Pure Tension Revealed by X-ray Diffraction Method—F. Bollenrath, V. Hauk and E. Osswald, 285–286.
Research Program—Fundamental Research Division, 49–52.
Resistance Welding Trench Mortar Fin Assemblies—J. H. Cooper, 501–506.

Shear and Hardness Properties—Effect of Welding on—Mild Steel Bars—W. D. Lewis, 559–561.
Shrinkage Stresses, Effect of Preheating Temperature in the Welding of High-Tensile Steel Plates—Richard W. Leutwiler, Jr., 198–203.
Spot-Welded Joints, The Effect of Weld Spacing on the Strength of—R. Della-Vedowa and M. M. Rockwell, 514–523.
Spot Welding Aircraft Research—W. F. Hess, R. A. Wyant and B. L. Averbach, 257–265.
Device for Measuring Tip Force and Current in—Halley Wolfe and R. W. Powell, 293–296.
Electrodes Refrigerant Cooled—F. R. Hensel, E. I. Larsen and E. F. Holt, 583–597.
0.040 In. S.A.E. X-4130 Steel—W. F. Hess and D. C. Herrschaft, 441–447.
N-A-X. High-Tensile Steel—W. F. Hess and C. R. Schroder, 203–208; Second Report, 241–244.
New Method of Cleaning Alclad for Production—Fred Morris, 197.
Spot Welds in Alclad 24S-T—W. F. Hess, R. A. Wyant and B. L. Averbach, 348–352.
Spot Welds in Aluminum Alloys—Correlation of Metallographic and Radiographic Examinations in—D. W. Smith and F. Keller, 573–583.
Test Specimens of Aluminum Alloys—W. F. Hess, R. A. Wyant and B. L. Averbach, 113–122.
Under Impact—A. M. Unger, H. A. Matis and E. P. Gruca, 94–98.
Stainless Steel, Effect of Welding Procedure—E. P. Auler, 98–106.
Heliarc Welding of—T. E. Piper, 490.
A Study of the Embrittling Effect of Zinc Upon—O. H. Henry and R. W. Schroeder, 287–290.
Welding of Light Gage Stabilized—S. L. Rich, 265–268.
Welds—Tensile Tests at Low Temperatures—O. H. Henry, C. K. Wicks and B. Hirshkowitz, 384–387; Fatigue Tests at Low Temperature—O. H. Henry and S. Cannizzaro, 387–388.
Stress Distribution in Welded Tube Connections—Frank L. Tocher, 125–128.
Stresses, Combined—Fatigue Strength of—Joseph Marin, 245–248.
Structural—An Investigation of Welded Connections for Angle Tension Members—G. J. Gibson and B. T. Wake, 44–49.
Investigation of Welded and Riveted Load-Bearing Stiffeners of Plate Girders—F. J. Evans and Harry Brenman, 280–285.
Static Tests of Fillet and Plug Welds—A Review of the Literature—W. Spraragen and G. E. Claussen, 161–197.
Steel Welds, Static and Dynamic Strength of—M. Roš, 254–256.
Tests on Butt Joints with Through Plate Stiffeners—W. J. Krefeld and J. D. Kenney, 269–279.
Tests of Welded Building Connections—Bruce Johnston and Gordon R. Deits, 5–27.
Tube Connections, Stress Distribution in Welded Tube Connections—F. L. Tocher, 125–128.
Sulphur Contaminated Steels, Flux for—Isaac Bencowitz, 237–241.

Tee-Bend Tests on Carbon-Manganese Steels—L. C. Bibber and J. Heuschkel, 485–490.
Tee-Bend Test to Compare the Welding Quality of Steels—George A. Ellinger, A. G. Bissell and Morgan L. Williams, 132–160.
Tube Connections, Stress Distribution in—F. L. Tocher, 125–128.
Tubing, S.A.E. X4130—Residual Stress in Butt-Welded—G. Sachs and T. Graham, 122–125.

Wear-Resistant Chromium Steels—Part III—A Review of the Literature from July 1, 1937 to January 1, 1941—W. Spraragen and H. H. Chiswik, 404–415.
Weldability of Carbon-Manganese Steels—C. H. Jennings, 448–450; Weld-Bead Hardness and Weld-Bead Bend Tests—O. E. Harder and C. B. Voldrich, 450–466.
Carbon-Manganese Steels Proposed Research Program, 620.
Effects of Cooling Rates on the Properties of Arc-Welded Joints in Carbon-Moly 0.50 Plates—W. F. Hess, 608–619.
Fusibility Tests, Review of the Literature—W. Spraragen and G. E. Claussen, 65–86.
Jominy End-Quench Hardenability Tests of Carbon-Manganese Steels—George A. Timmons, 467–477.
A Quick Method of Comparing Substitute Steels—A. B. Kinzel, 286–287.
Research Program—Fundamental Research Division, 49–52.
Weldability of Steels—W. H. Bruckner, 55–59.
Weldability of Some Low Alloy Steels—J. S. Vatchagandhy and G. P. Contractor, 561–572.
Tests of Carbon-Manganese Steels, C. E. Jackson, M. A. Pugacz and G. G. Luther, 477–484.
Weld Quench Gradient Tests—Walter H. Bruckner, 496–500.

X-Ray Diffraction Method of Determining Tension Residual Stresses—F. Bollenrath, V. Hauk and E. Osswald, 285–286.

1942 BOUND VOLUME

Bound Volumes of the JOURNAL of the Society for the year 1942 are now available with imitation black leather covers. Contains a wealth of information on the latest developments in welding. Also contains Subject and Authors' Index. Price, $5.00 plus postage to members; $6.50 to non-members plus postage.

SETS OF BOUND VOLUMES OF JOURNAL

In order to provide some of the new members of the Society with an opportunity to complete their library on Current Welding Literature, the AMERICAN WELDING SOCIETY is offering to these new members an opportunity to purchase the last nine bound volumes for the years 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941 and 1942 at $40.00 a set plus postage. The price to non-members for individual volumes is $6.50 and for the set $45.00 plus postage.
Each bound volume contains a Subject and Authors' Index and is bound in attractive imitation black leather covers. The set probably includes the most important welding information available in the literature.
